WHO IS RESPONSIBLE.

That the Democratic party of this District is divided to some extent does not row admit of question, and that some one or more persons are responsible for the division is equally true, and we pre pose in as brief a mauner as possible to enquire who it is.

Before the din of the eauguinary con and all who with him, believed a man had the constitutional right to be a can didate for Congress without a nomination from his party. From that moment to the present it has been the constant effort of the leaders of king caucus' host, to attempt to cover up their own macinations against the supremacy of Democratic principles by the ever significant ery of "stop thief."

But to come down more nearly to the present time-carly in the Spring a meeting was held in the counties of Andersen and Spencer endorsing Mr. Jew ett, and declaring themselves for him .-The county of Anderson then repudia-

He actually made a motion to adjourn while occupying the chair and put that motion without a second. We make these state ments from the information of gentlemen of undoubted veracity of both parties, who were present at the suceting.

It is then in this way the Washington county delegation got their appointment, and went to the convention and cast the vote of that county to force Mr. Jewett this significant language off the track, and that too at a time when the best informed convention men did not deny the fact that a very large majority of the Democrats in that county were for him in preference to any other in the district.

FAMILY SEWING MACHINES

Three Machines eew from two spools, as purchased from the atore, requiring no re-winding of thread; they Hem. Fell, Gather, and Stitch in superlor atyle, finishing each seam by their own operation, without recourse to the hand needle, as is required by other machines. They will do better and cheaper sewing than a seematrees can, even if she ways for exact on heavy seeds. even if she works for one cent an Aour, and are, noquestionably, the best Machines in the market for family sewing, on account of their simplicity, durability, case of management, and adaptation to all varieties of family sewing—excuting either heavy or fine work with equal facility, and without angular adjustment.

These Machines eew from two spools, as purtricity, per orming cures in chorter time than anythiag else known. During the brief period sieca their Introduction, they have carried happines to the herris of thousands who now rejoice in freedom from long lingering pein and disease, which many other remedies had failed to care, ludeed it le no exageration, when we say they are decidely the best preparations known for the cure of those diseases for which they are recommended. They are bound to time and stand preeminent in the list of valuable remedies, and they will certainly be osed when many of the nostrumanow in vogue shall have Iallen into everlasting oblivion.

It is well known the public has been deceived.

It is well known the public has been deceived in many instances, by being induced to buy worthless and inest preparations; but there Medicines need only to be used, to be appreciated; and we hope they will not be condemned by those and we hope they will not be condemned by those who have not used them, before giving them a fair trial. If it were necessary, we could furnish many certificates from the best men of the country, but we would asy, that the use of one hottle in a neighborhood, would do more to convince the public of its superior qualities, then all the certificates in the world. So come and see for yourselves, ye is me and saffering! Oh, ya Rheumatic and dying, come and see?!
